

Adira – Psychiatric Residential Treatment

residential treatment for adolescent females ages 12-17 years

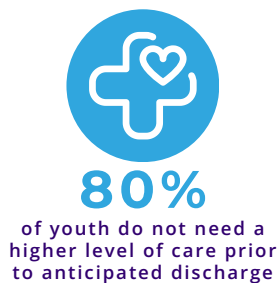

overview

A residential mental health treatment program for adolescent females ages 12-17 diagnosed with a mental illness and involvement in human trafficking.

This program provides a holistic treatment approach for girls who have been identified as high risk for sexual exploitation and sex trafficking in our community.

Our licensed clinician uses a trauma informed approach designed to support adolescents and their families through a journey of healing.
